**OFFICE OF PETITIONS****IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Appl. No. : 10/035,633  
Applicant : Eldridge et al.  
Filed : December 28, 2001  
TC/A.U. : 3729  
Examiner : Carl J. Arbcs

Confirmation No. 6089

Docket No. : P3C1-US

Mail Stop Petition  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**PETITION UNDER 37 C.F.R. § 1.313(c) TO WITHDRAW FROM ISSUE****To Whom It May Concern:**

Applicants respectfully petition the Director under 37 C.F.R. § 1.313(c) that the above-identified patent application be withdrawn from issue to consider Applicants' Request For Continued Examination of the application. (See 37 C.F.R. § 1.313(c)(2).) A Request For Continued Examination (RCE) in compliance with 37 C.F.R. § 1.114 is submitted herewith. The RCE includes an Information Disclosure Statement ("IDS") citing the following four Japanese patent documents, which were first cited by the Japanese Patent Office in an action dated March 16, 2006 in a counterpart Japanese patent application: (1) JP 61-49432, (2) JP 02-250327, (3) JP 63-136657, and (4) JP 02-109339. The IDS also cites U.S. Patent No. 4,784,972, which is a U.S. counterpart to JP 02-109339.

Applicants paid the issue fee in the above-identified patent application on February 28, 2006. (A copy of the issue fee payment record, which was received at the Patent and Trademark Office on March 3, 2006, is attached as Exhibit A.) The four Japanese patent documents cited in the IDS were first identified to Applicants in a letter dated April 4, 2006 from a Japanese law firm, and Applicants thereafter discovered the U.S. patent cited in the IDS. (A copy of the April 4, 2006 letter is attached as Exhibit B.) Applicants believe that the five references cited in the

01 FC:1464

130.00 OP

Appl. No. 10/035,633  
Petition dated April 20, 2006

IDS should be reviewed and considered by the Examiner in charge of the above-identified application before the application issues as a patent. Applicants believe that allowing the Examiner to consider those references constitutes good and sufficient reason for withdrawing the application from issue.

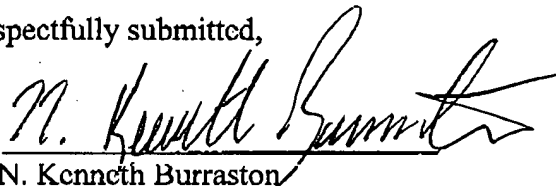

For the reasons discussed above, Applicants respectfully request that the above-identified patent application be withdrawn from issue and prosecution reopened in accordance with the RCE submitted herewith to allow the Examiner to consider the four Japanese patent documents cited by the Japanese Patent Office and a corresponding U.S. patent document.

Applicants submit herewith a Credit Card Payment form providing payment for a petition fee of \$130.00 as set forth in C.F.R. 17(h) and an RCE fee of \$790.00. In addition, Applicants authorize the Director to charge any additional fee or any deficiency in the fees provided for as needed for acceptance of this paper to Deposit Account No. 50-0843 (order no. 12439-0190).

Respectfully submitted,

Date: April 20, 2006

Re: Applicant: FormFactor, Inc.  
Japanese Patent Application No. 2000-202978  
Your Ref: P3-D1-JP  
Our Ref: F0250 RP06JP/KOS

Dear Mr. Merkadeau:

We have received an Office Action from the Japan Patent Office regarding the above-referenced application. Enclosed are a copy of the Office Action, its English translation, a copy of the Patent Publications cited, and a copy of English abstract for the cited Japanese Patent Publication.

The term to respond to this Office Action expires on

June 16, 2006.

This date can be extended for three months by request.

We would appreciate it if you could provide us with your instructions by June 9, 2006 our time, to allow us time to prepare the arguments and amendments.

Please be informed that we are also allowed to file a divisional application during this period, namely by June 16, 2006. Therefore, if the applicant wishes to file any divisional applications, please provide us with your instructions by June 9, 2006.

If you need our detailed comments, please do not hesitate to contact us.

Very truly yours,

Yoshiyuki Inaba

YI/KOS/mis  
Encls.

(Translation)

Reference No.: 500YY026

Mailing No.: 108782 Mailing Date: March 16, 2006

**NOTICE OF REASONS FOR REFUSAL**

Patent Application No.: 2000-202978  
Drafting Date: March 14, 2006  
JPO Examiner: Masaaki Sakamoto 8265 4R00  
Attorneys for Applicant: Yoshiyuki Inaba (and two others)  
Applicable Provisions: Sections 17<sup>bis</sup>(iii), 29(2), 36, 37

It has been found that the present patent application should be refused for the reasons stated below. If the Applicant has any argument against this Notice, such argument should be filed within three months from the mailing date above.

**Reasons**

1. The amendment dated November 13, 2002 has not been made within the scope of matter described in the specification or drawings originally attached to the request, regarding the following points. Accordingly, it does not fulfill the requirements set forth in Section 17<sup>bis</sup>(iii) of the Patent Law.

**Notes**

The content of the post-amendment claims is not clearly described in the specification or drawings originally attached to the request, nor is it matter obvious from the matter described in the same.

(An amendment made within the scope of matter described in the

original specification should be validated by pointing out not paragraphs, but specific sentences in the part in the description of the original specification that is the grounds for the amendment, and explaining the correspondence.)

2. The invention according to the below claims in the present application could have easily been made prior to the filing of the application by any person having common knowledge in the technical field to which the invention pertains, based on inventions described in publications distributed in Japan or overseas or made available to the public through communication media prior to the filing of the application. Accordingly, it is unpatentable under the provisions of Section 29(2) of the Patent Law.

**Notes (Including the List of Cited References)**

- Claims 1-9
- Cited References 1-4
- Remarks

Cited Reference 1 discloses an electronic assembly connected to a print circuit board by a cushioned (corresponding to "recoverable" in the invention in the present application) contact structure. The structure of carrying a plurality of semiconductor dies is commonly used (for example, see Cited Reference 2). In the electronic assembly disclosed in Cited Reference 1, too, carrying a plurality of semiconductor dies could be done arbitrarily by any person skilled in the art. Providing a wire with a protection layer (Claim 6) and forming a contact structure on a sacrifice substrate (Claim 7) are described respectively in Cited References 3 and 4.

3. The description in the specification and drawings in the present application does not fulfill the requirements set forth in Section 36(4) of the Patent Law regarding the following points.

### Notes

The detailed description of the invention in the present application does not include a clear and sufficient description with which any person skilled in the art can implement the invention according to Claims 1-9.

(Only the embodiment of the invention according to the claims in the present application should be described as the embodiment of the invention; other embodiments should be described as reference examples.)

4. The present application does not fulfill the requirements set forth in Section 37 in the Patent Law.

### Notes

(1) Although the product invention according to Claim 1 and that according to Claims 10-12 share the same problem to be solved, they do not share the main feature of the content essential for the configuration.

(2) The product invention according to Claim 1 is not a machine, device, or apparatus directly used for conducting a method invention according to Claims 13-29.

Moreover, the invention according to Claims 13-29 is not a method for producing, using, or treating a product invention according to Claim 1.

Because the present application does not comply with Section 37 of the Patent Law, no examination has been conducted on the invention according to the claims other than Claims 1-9.

Note that the inventions according to Claims 10, 11, 12, 13, 14-23 and 25-28, 24-28, and 29 do not fulfill the requirements for unity.
